

READING SYSTEM1 ABSTRACT OF THE DISCLOSURE

2

3 A speed reading system includes a plurality of
4 printed sheets, each sheet having a pair of vertically
5 extending scan bars and a plurality of printed lines
6 of indicia extending perpendicular to the scan bars.
7 Selected printed lines of indicia have a plurality of
8 grouped scan words therein with each scan word being
9 in a different font and larger type than the non-
10 scanned words and each group of scan words being
11 positioned with the first scanned word in the group in
12 one line being adjacent to the vertically extending
13 scan bars. A plurality of scan line indicators are
14 located adjacent and between the scan bars with one
15 scan line indicator being adjacent each scan line
16 having at least one scan word therein with each scan
17 line indicator being indicative of a line having scan
18 words therein.
